ICoASL - 11 Mei 2017
The need for efforts to collect, store and preserve thousands of manuscripts collection that is widespread in the archipelago as a cultural heritage in written form.

Increasing number of collections of manuscripts which are destroyed or decayed because with age or due to any improper conduct by the public and the heir to sell it to foreigners.

The rapid development of Information Technology in Digital form that can be applied in terms of preserving cultural heritage.
Approximately thousands titles of Manuscripts in various forms of handwriting contained in various media such as paper, palm leaves, dhaluang, bark, animal skins, wood, bamboo, clay, and ceramics.
WHY DIGITISATION?

- In a digital scope, with the transfer of media is digital product creation process that has value to be preserved at all times.

- Calculation of long-term time in the creation of digital products needs to be done when the system is designed to support start and before the digital conversion efforts began.

- Efforts to design and create a digital product can provide added value to the content of information on the documents that can be used as a source of service information.

- Maintenance efforts that have been generated digital products need to be given special attention so it can run well on systems that have been made.

- The transfer of digital media is not absolute but depends on sustained change.
RESOURCES NEEDS

- Team members or staff who are trained in their field.
- Supporting the availability of devices and technologies.
- Adequate room to do the job.
- Availability of cost (funding).
THE BASIC PRINCIPLES OF DIGITAL MEDIA

- **Length of **old**: Efforts to control the media in digital scope is focused on how to maintain the service life of the disc media (disk) or data storage media is physically quite vulnerable.

- **Selection**: The selection process carried out in order to provide added value to the conservation efforts undertaken. Selections include defining values, respect for anything, and then decide the need for conservation efforts in place a suitable or appropriate.

- **Quality**: In the digital scope to maximize the quality is significantly limited by the technology to capture and display images that are used in electronic media. Transfer of digital media is done by considering the good quality is capable of giving the appearance that is not much different from the original source with a touch of technology used.

- **Integrity**: The scope of the digital integrity of the physical meaning associated with the digital file storage media that have been compressed and stored mathematically with a variety of formats and can be sent over existing computer networks.

- **Accessible**: the scope of the current digital preservation efforts and how to access the result is an alloy that can not be separated.
DIGITIZATION WORKFLOW

DIGITAL FILE BACK UP
To further optimize the utilization of manuscripts by the community, especially among the younger generation there is need for awareness of the importance of conserving the nation's noble heritage by way of knowing and understanding the content of the manuscript either through formal study and forums communities.

- Make efforts to transfer digital media, more than the text and the translation to be equally accessible in the archipelago.

- Cooperation at the regional, national and international levels in terms of efforts to collect and save the manuscripts which is still widely spread in the community are also other sources that have been taken abroad.
