SURAT PERSETUJUAN SKRIPSI/TUGAS AKHIR

Hal   : Permohonan
Lamp : -

Kepada
Yth. Dekan Fakultas Sains dan Teknologi
UIN Sunan Kalijaga Yogyakarta
di Yogyakarta

Assalamu'alaikum wr. wb.

Setelah membaca, meneliti, memberikan petunjuk dan mengoreksi serta mengadakan perbaikan seperlunya, maka kami selaku pembimbing berpendapat bahwa skripsi Saudara:

Nama   : Muhammad Siddiq Afianto
NIM   : 07650055
Judul Skripsi : **Rancang Bangun Sistem Rekomendasi Game Menggunakan Collaborative Filtering Studi Kasus Toko Online Kiosk Games**

sudah dapat diajukan kembali kepada Program Studi Tekni Informatika Fakultas Sains dan Teknologi UIN Sunan Kalijaga Yogyakarta sebagai salah satu syarat untuk memperoleh gelar Sarjana Strata Satu dalam Teknik Informatika

Dengan ini kami mengharap agar skripsi/tugas akhir Saudara tersebut di atas dapat segera dimunaqsyahkan. Atas perhatiannya kami ucapkan terima kasih.

Wassalamu'alaikum wr. wb.

Yogyakarta, 18 Juli 2013
Pembimbing

M. Mustakim ST., M.T.
NIP: 19790331 200501 1 004

PERNYATAAN KEASLIAN SKRIPSI

Yang bertanda tangan di bawah ini :

Nama	:	Muhammad Siddiq Afianto
Nim	:	07650055
Program Studi	:	Teknik Informatika
Fakultas	:	Sains dan Teknologi

Menyatakan bahwa skripsi dengan judul **RANCANG BANGUN SISTEM REKOMENDASI GAME MENGGUNAKAN COLLABORATIVE FILTERING STUDI KASUS TOKO ONLINE KIOSK GAMES** tidak terdapat pada karya yang pernah diajukan untuk memperoleh gelar sarjana di suatu Perguruan Tinggi, dan sepengetahuan saya tidak terdapat karya atau pendapat yang pernah ditulis oleh orang lain, kecuali yang secara tertulis diacu dalam naskah ini dan disebutkan dalam daftar pustaka.

HALAMAN PERSEMBAHAN

Skripsi ini kupersembahkan untuk:

- ✓ My Lovely Dad, Drs. H. Sudodo, MM.
- ✓ My Lovely Mom, Hj. Tri Sulistyo Utami, SE.
- ✓ My Beloved Sister, Dewi Rosyidah Rahmawati
- ✓ Clan Gamexeon (-GX-)
- ✓ Anggota "Kursus Seturan"
- ✓ Keluarga dan teman – teman semua
- ✓ Almamater UIN Sunan Kalijaga 07

KATA PENGANTAR

Alhamdulillah, segala puji bagi Allah SWT atas segala kemudahan, rahmat, dan petunjuk-Nya selama pengerjaan skripisi, sehingga penulis dapat menyelesaikan skripsi ini dengan baik pada waktunya. Tidak lupa juga penulis mengucapkan terima kasih yang sebesar-besarnya kepada:
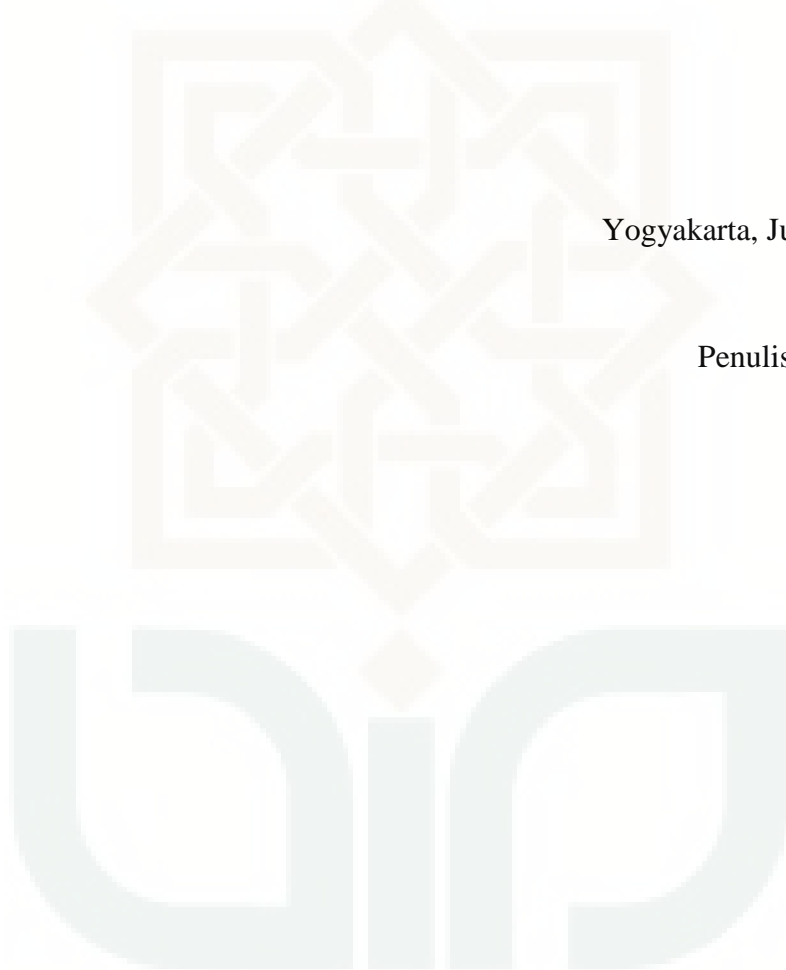

1. Kedua orang tua, Drs. H. Sudodo, M.M., dan Hj. Tri Sulistyo Utami, S.E., yang selalu memberikan dukungan, motivasi, dan yang tak pernah berhenti berdoa untuk anak mereka.
2. Bapak M. Mustakim, S.T., M.T., selaku dosen pembimbing yang terus memberikan bimbingan, arahan, dan masukan yang tidak memberatkan mahasiswa selama penyusunan skripsi ini.
3. Para Dosen Teknik Informatika yang telah memberikan banyak ilmu kepada penulis
4. Dewi Rosyidah Rahmawati, Adik perempuan satu – satunya yang juga tetap memberikan dukungan dan motivasi, serta ikut memeriahkan suasana malam ketika penulis mengerjakan skripsi dengan memutar musik keras-keras :).
5. Instruktur - Instruktur di Jogja IT Training Center, yang banyak memberikan bantuan dan bimbingan kepada penulis dalam menyelesaikan skripsi ini.
6. Keluarga besar Clan Gamexeon (-GX-) yang selalu menemani penulis *battle* memperebutkan wilayah di game online *World of Tanks* ketika penulis sedang suntuk.
7. Teman – teman anggota "Kursus Seturan", yang selalu menjadi teman *sharing*.
8. Teman – teman Teknik Informatika 2007 yang sebagian sudah lulus lebih dahulu.
9. Serta semua pihak yang telah membantu penulis dalam pelaksanaan penyusunan skripsi ini yang namanya tidak bisa penulis sebutkan satu-persatu.

Penulis menyadari masih banyak kekurangan dan kelemahan dalam pelaksanaan dan penyusunan skripsi ini. Semoga kedepannya dapat menjadi pengalaman yang berharga bagi penulis dalam menghadapi persaingan dunia kerja yang sesungguhnya.

Akhirnya, semoga skripsi ini dapat memberikan manfaat bagi pihak – pihak yang telah meluangkan waktu untuk membaca skripsi ini. Kritik dan saran yang membangun sangat diharapkan untuk menyempurnakan penulisan laporan skripsi ini.

Rancang Bangun Sistem Rekomendasi Game

Menggunakan Collaborative Filtering

Studi Kasus : Toko Online Kiosk Games

Muhammad Siddiq Afianto
NIM. 07650055

INTISARI

Kiosk Games merupakan sebuah toko online yang bergerak dalam bidang penjualan game PC. Banyaknya jumlah game yang dijual, membuat beberapa kustomer kesulitan dalam menentukan pilihan mengenai game apa yang hendak mereka beli dan cocok dengan selera mereka. Hal ini yang menjadikan perlunya sebuah sistem rekomendasi yang mampu memberikan rekomendasi judul game yang sesuai selera kustomer untuk memudahkan mereka dalam memilih game yang hendak dibeli.

Penelitian ini menggunakan metode *Collaborative Filtering*, dimana sistem akan mencari kesamaan model pembelian (*similiar user*) atara kustomer yang sedang login dengan kustomer yang lain. Selanjutnya, sistem akan mecari rating antar kustomer berdasarkan tingkat kemiripan yang ada. Semakin mirip kesamaan game yang pernah dibeli, maka rating akan semakin tinggi. Setelah rating antar kustomer didapat, maka rating ini akan digunakan untuk memberikan nilai rekomendasi pada game-game yang dirasa cocok dengan kustomer yang sedang login.

Hasil penelitian dari sistem rekomendasi game menggunakan metode *collaborative filtering* ini mampu memberikan rekomendasi judul game kepada kustomer dengan memberikan nilai rating dari terbesar hingga terkecil berdasarkan kesamaan pembelian antara kustomer yang sedang login dengan kustomer lain.

Kata Kunci : *Collaborative filtering*, Sistem rekomendasi, Toko game online.

Design of Games Recommendations System

Using Collaborative Filtering

Case Study: Online Store Kiosk Games

Muhammad Siddiq Afianto
NIM. 07650055

ABSTRACT

Kiosk Games is an online store which is sales of PC games. A large number of games that they sold, making some customers difficulty in determining the choice of what game they want to buy and match their tastes. That is why it need for a recommendation system that is able to give recommendations for game titles to simplify them in choosing games that will be purchased.

This study uses the Collaborative Filtering, where the system will look for similarity model of purchase (similiar user) only between customers who are logged in with another customer. Furthermore, the system will look for customer rating based on the degree of similarity between the purchase order that already exist. The more similar games that have been purchased, the higher the rating will be. Then, this rating will be used to provide recommendations on the value of those games that is fitting with the customer that is being logged in into the system.

The results of a game recommendation system using a collaborative filtering method is able to make games title recommendations by providing customer value rating from largest to smallest based on common purchases among customers who are logged in with another customer.

Keywords: *Collaborative filtering, recommendation systems, online gaming store.*

BAB I

PENDAHULUAN

1.1. Latar Belakang Masalah

Perkembangan komputer saat ini dapat dimasukkan dalam kategori mengagumkan. Betapa tidak, hampir semua pekerjaan di dunia telah dikendalikan oleh komputer. Mulai dari bidang pendidikan, kesenian, hingga bidang usaha, baik usaha kecil menengah maupun usaha yang menembus pasaran global dunia juga memanfaatkan teknologi komputer untuk memudahkan pekerjaan mereka.

Selain komputer, hal lain yang juga mengalami perkembangan pesat adalah layanan internet. Pada beberapa waktu silam, di Indonesia sendiri internet merupakan fasilitas yang dibilang masih mahal, dan untuk mengaksesnya juga tidak mudah. Namun dengan perkembangan teknologi yang semakin cepat, maka kini hampir semua orang sudah dapat memanfaatkan fasilitas ini, baik itu untuk bersosialisasi melalui media sosial, membaca berita, mencari informasi, bahkan berjualan via online.

Bisnis online, terutama yang berkaitan dengan jual-beli sendiri sebenarnya sama fungsinya dengan bisnis jual-beli pada umumnya. Yang membedakan hanyalah fasilitas yang digunakan dan cara pembayarannya. Bila pada jual-beli konvensional penjual dan pembeli bertemu secara langsung dan pembeli dapat melihat dan memilih barang yang di inginkan secara langsung, pada bisnis jual-

beli online penjual cukup menampilkan spesifikasi dan gambar dari barang yang dijual, sedangkan pembeli sendiri cukup memilih barang tersebut tanpa harus datang ke tempat penjual.

Pada bisnis jual-beli online, kepercayaan dan memberikan informasi secara benar adalah hal wajib dan harus dilakukan agar calon pembeli memperoleh informasi yang valid dan tidak merasa tertipu. ini juga menjadi standar dalam suatu bisnis sebagai bentuk pelayanan terhadap konsumen. Dengan terpenuhinya kebutuhan konsumen, maka bisnis yang dijalankan bisa sukses kedepannya. dengan memberikan pelayanan yang prima, diharapkan dapat memberikan kepuasan konsumen sehingga nantinya mereka akan kembali berbelanja disini.

Kiosk Games merupakan salah satu contoh usaha penjualan game yang dilakukan secara online. Toko online ini memberikan layanan berupa penjualan game khusus untuk pengguna PC (*Personal Computer*). Dengan semakin banyaknya game yang beredar dipasaran dan *genre* game yang bervariasi, maka pelayanan prima dan pemberian informasi yang akurat terkait dengan game-game yang ada sangat diperlukan.

Namun permasalahan yang kemudian muncul terkait dengan penjualan game secara online ini adalah, meskipun informasi terkait dengan garis besar dan spesifikasi game sudah dicantumkan, masih banyak kustomer yang kurang mengerti dengan informasi-informasi tadi, sehingga tidak sedikit yang masih bertanya ini-itu dan pada beberapa kasus sering mengalami kesulitan atau *crash* sewaktu menginstall game yang telah dibeli. Mau tidak mau pada akhirnya Kiosk

Games harus menjawab berbagai komplain yang sering kali memiliki kasus dan jawaban yang sama, sehingga sangat tidak efektif karena harus menjelaskan solusi yang sama secara berulang kali terhadap orang-orang yang berbeda.

Dari uraian di atas, maka permasalahan yang diangkat adalah bagaimana mengembangkan sistem rekomendasi game yang dapat memberikan informasi dan saran terkait dengan game yang sesuai dan cocok dengan PC kustomer, sehingga dapat meminimalisir kesalahan dan masalah teknis yang akan timbul kemudian hari.

Berdasarkan uraian dari latar belakang di atas, maka skripsi dengan judul *"Rancang Bangun Sistem Rekomendasi Game Menggunakan Collaborative Filtering Studi Kasus Toko Online Kiosk Games"* diharapkan mampu menangani permasalahan yang telah dijabarkan tadi.

1.2. Rumusan masalah

Agar skripsi dapat berjalan sesuai yang diharapkan, maka rumusan masalah yang ditetapkan adalah:

1. Bagaimana merancang suatu sistem rekomendasi yang efektif dan efisien pada bisnis online, dalam hal ini usaha penjualan game.

2. Bagaimana merancang sistem yang dapat memberikan informasi lebih akurat dan memudahkan kustomer untuk memilih game-game yang di inginkan dan sesuai dengan selera mereka.

3. Bagaimana merancang sistem yang memudahkan pengusaha game dalam menjalankan usaha dan transaksi dengan kustomer.

1.3. Batasan Masalah

Demi terarahnya pembahasan yang dilakukan, maka batasan permasalahan yang diambil yaitu :

1. Sistem diimplementasikan menggunakan bahasa pemrograman PHP.

2. Membatasi pada pemberian rekomendasi game dengan metode *collaborative filtering* untuk setiap user yang login.

3. Rekomendasi hanya untuk game-game yang ada pada database sistem.

4. Bagi kustomer, sistem ini hanya dapat menampilkan informasi user, list game, order, konfirmasi pembayaran, konfirmasi pengiriman, dan testimoni.

5. Bagi pemilik usaha, mereka dapat mengelola order secara lebih baik dan mendapatkan laporan keuangan pada periode tertentu.

1.4. Tujuan Penelitian

Tujuan penulisan skripsi ini antara lain :

1. Merancang suatu sistem rekomendasi yang mampu berperan sebagai sarana yang efektif dan efisien dalam bisnis online, dalam hal ini usaha penjualan game.

2. Merancang sistem yang dapat memberikan informasi lebih akurat sehingga memudahkan kustomer untuk memilih game-game yang di inginkan dan sesuai dengan selera mereka.

3. Merancang sistem yang memudahkan pengusaha game dalam menjalankan usaha dan transaksi dengan kustomer.

1.5.   Manfaat

Adapun manfaat dari penulisan ini adalah:

1. Membangun sistem rekomendasi yang dapat digunakan oleh penyedia jasa penjualan online untuk memberikan pelayanan lebih kepada kustomer dengan memberikan rekomendasi yang sesuai.

2. Bagi kustomer atau pelanggan, dengan adanya sistem rekomendasi ini diharapkan mampu memberikan rekomendasi dan informasi game yang dibutuhkan dan sesuai dengan keinginan kustomer.

3. Membantu pihak penjual untuk memudahkan transaksi dan mendapatkan laporan keuangan pada periode tertentu.

1.6.   Keaslian Penelitian

Penelitian serupa yang berhubungan dengan sistem rekomendasi sudah pernah dilakukan sebelumnya, yaitu pada sistem rekomendasi buku di perpustakaan. Namun pada kasus sistem rekomendasi untuk game belum pernah dilakukan. Penelitian ini menitikberatkan pada penyajian rekomendasi game berdasarkan metode *collaborative filtering*.

BAB VII

KESIMPULAN DAN SARAN

7.1 Kesimpulan

Berdasarkan aktivitas yang telah dilakukan penulis selama perancangan hingga implementasi Sistem Rekomendasi Game menggunakan *Collaborative Filtering* ini, dapat diambil beberapa kesimpulan:

1. Penelitian ini berhasil merancang sistem rekomendasi yang efektif dan efisien pada bisnis online, dalam hal ini usaha penjualan game.

2. Penelitian ini mampu menghasilkan sistem yang dapat memberikan informasi lebih akurat dan memudahkan kustomer untuk memilih game-game yang di inginkan dan sesuai dengan selera mereka.

3. Penelitian ini mampu merancang sistem yang memudahkan pengusaha game dalam menjalankan usaha dan transaksi dengan kustomer.

7.2 Saran

Sistem rekomendasi game ini tidak terlepas dari kekurangan dan kelemahan, terutama dalam tampilan yang cukup sederhana serta konten seadanya yang disebabkan keterbatasan yang dimiliki penulis. Oleh karena itu, untuk pengembangan sistem rekomendasi game yang lebih baik, penulis menyarankan beberapa hal, antara lain:

1. Perbaikan pada *interface* dan konten yang ada sehingga kedepannya nanti diharapkan sistem menjadi lebih menarik sehingga pengguna merasa nyaman dalam menggunakan sistem ini.

2. Kekurangan dari sistem rekomendasi game menggunakan metode *collaborative filtering* ini adalah sistem tidak bisa memberikan rekomendasi game terbaru kepada pembeli. diharapkan untuk pengembangan berikutnya dapat menambahkan metode lain seperti *content based filtering* agar bisa menyelesaikan kekurangan yang ada sehingga sistem akan memberikan rekomendasi yang lebih tepat kepada pembeli.

Akhirnya, dengan segala keterbatasan penelitian yang berjalan ini, penulis berharap semoga penelitian ini memberikan pengetahuan baru bagi pembaca, dengan harapan di esok hari kelak, sistem ini dikembangkan lagi secara maksimal.
